

Carpet for Golf Clubs

In clubs where traditional metal spikes are allowed:

Carpet should be chosen with the following minimums in mind:

- Cut pile rather than loop pile construction.
- Minimum pile thickness of 7/16 inch (.430").
- Minimum pile weight of 40 oz. per square yard.

In clubs where the new low profile plastic “spikes” are in favor:

Carpet should be chosen with the following minimums in mind:

- Cut pile is still preferred.
- Minimum thickness of 3/8 inch (.375")
- Minimum pile weight of 35 oz. per square yard.
