

FlorSept - The Active Antimicrobial in Shaw Contract Group Carpet

Product Characteristics of FlorSept:

FlorSept is a broad spectrum antimicrobial effective against both Gram Positive and Gram Negative bacteria, as well as mold, mildew, and fungi.

Laboratory tests have shown that FlorSept will withstand multiple washes and abrasion while still remaining effective as tested under GSA requirements for Antimicrobial Carpets.

FlorSept is engineered and designed to last for the life of the carpet.

FlorSept is an approved chemical and registered with the Environmental Protection Agency (EPA). Contact Shaw INFORUM for the EPA number for your product.

Features and Benefits of Shaw Contract Group Carpet with Antimicrobial Protection:

Durable, built-in antimicrobial protection inhibits bacteria, mold, mildew, including odors associated with these problems.

Inhibits the premature deterioration of the carpet by mitigating the microbial contamination of the product.

Gives deodorant protection against those unwanted odors caused by bacterial breakdown of organic matter within the carpet structure.

Controls potential mildew problems in high moisture environments with its built-in antimicrobial action.

Safeguards against the premature carpet discoloration caused by microbial contamination.

Enables the carpet to effectively resist the growth and action of a broad spectrum of bacteria, mold, and mildew.

Bottom Line:

Shaw Contract Group carpet products with FlorSept create a fresher, more hygienic floor covering.
